Republic of the Marshall Islands
2050 Climate Strategy

Angeline Heine
National Energy Planner, Ministry of Resources & Development

2050 Pathways Platform Annual Meeting
Paris, 24 & 25 April 2018
Our Nationally Determined Contribution
Reasons we are producing a 2050 Strategy

• To achieve better **domestic coordination**;
• To improve **donor coordination**;
• To deliver **benefits for the Marshallese people**; and
• To continue to be an **international climate leader**.
Commitment & process to develop Strategy

November 2016 (COP22): President Heine says RMI will develop a 2050 Climate Strategy, subject to support.

February 2017: RMI Cabinet establishes *Til e Til eo* Committee to oversee 2050 Climate Strategy.

May to August 2017: Work begins on 2050 Climate Strategy, including data collection & technical modelling.

Late 2017: First draft of 2050 Climate Strategy produced, considered by *Til e Til Eo* Committee.

Q2 2018: Second draft of 2050 Climate Strategy produced.

July/August 2018: Domestic (2nd National Climate Change Dialogue) & Donor (Partners Dialogue) Consultation.

Late 2018: Final 2050 Climate Strategy presented to Cabinet, and launched.
Emerging challenges & lessons

- Lack of available environmental data;
- Cannot be a “one-off” document – will need to be reviewed and updated;
- Process is already delivering benefits – e.g. implementation of 2025 NDC;
- Waste and transport emissions harder than renewables – need help;
- Adaptation will be harder than mitigation – and knowledge lags behind;
- Donors are critical – Partners Dialogue / Donor Roundtable; and
- Must be owned by the people – 2nd National Climate Change Dialogue.
Partners Dialogue - “Donor Roundtable”

• Date to be confirmed (in July or August 2018)
• Aim is to engage a wider set of partners (development ministries, development banks, implementing organizations, companies).
• 2-days of consultation and input on Strategy prior to its finalization.
• Being supported and run by the NDC Partnership.

• Please consider attending. More information will be distributed via the 2050 Pathways Platform.
